Forecast for Friday 02 Jun 2023

Weather: Rather extensive cloud covering the park first thing, especially in the east, will soon break by mid-morning to leave another fine day with prolonged warm sunshine. Staying dry with clear skies through the evening and into the overnight period though turning gusty along the highest slopes.

Chance of cloud-free hill tops above 600m: 40% in the east first thing,70% further west rising to 100% by mid-morning.

Low cloud and visibility: Low cloud across the east and some central areas of the park, with bases around 500-600 m obscuring some routes at first, rising and breaking, though higher summits likely to remain above the cloud. Good to very good visibility throughout, dropping to poor in any low cloud.

Forecast for Saturday 03 Jun 2023

Weather: A chilly start with some patchy low cloud first thing, however much less extensive than previous days and breaking more readily to leave a fine and sunny day. Remaining dry into the evening with clear skies. Breezy at first across the highest slopes.

Maximum wind: Northeasterly 15 mph gusting 20 mph.

Chance of cloud-free hill tops 600m: Greater than 90%.

Low cloud and visibility: Patches of low cloud first thing in the east with bases 400-500 m soon lifting and breaking. Otherwise clear skies. Visibility generally very good, briefly poor in any early low cloud.

Temperature: **Valleys:** Plus 8 Celsius rising to Plus 20 Celsius.
At 600m: Plus 4 Celsius rising to Plus 15 Celsius.
Freezing level: Above summits.
